

## A Green Environment

In line with our corporate philosophy, NTPM strives to reduce our impact on the environment, climate change and sustainability. In our continuous effort in doing so, we are this far proud to be awarded and accredited with the following certifications.

We are ISO 9001: 2015 Certified. On 27th April 2002, we obtained ISO 9001:2015 certification.

We are re-certified every 3 years. With good practices and compliance with ISO 9001:2015, we continue to ensure the production of quality products for our consumers.

NTPM is proud to announce that we have finally attained the ISO 14001: 2015 accredited by UKAS certification on 26 May 2008.

Our 3 main components for environmental policy are

- Compliance with applicable legal and other requirements
- Prevention of pollution and
- Continual improvement.

We focus on significant environmental aspects and ensure all processes and activities which produce product that will give an effect to environment comply with applicable legal requirements. We also define objectives and targets and implement programs to improve the environmental performance that benefit the company.

With greater demand in hygiene and sanitized products for food and products in contact with food management, NTPM continues to re-affirm its commitment to quality management system in implementing the Hazard Analysis and Critical Control Point (HACCP) system to its table napkins segment and virgin pulp kitchen towel.

The implementation ensures that potential hazards to foods safety are recognized, regulated, prevented, monitored and controlled. With proper hygiene guidelines and compliance to the HACCP system, NTPM obtained the HACCP certification on 28 June 2007.

The Forest Stewardship Council (FSC) works to improve forest management worldwide, and through certification creates an incentive for companies to follow the best social and environmental practices.

FSC chain of custody certification verifies that FSC-certified material has been identified and separated from ineligible and unacceptable material as it makes its way along the supply chain from the forest to the market.

As part of a green company, NTPM has been certified FSC CoC through its products.

The standard is Sanitary Paper Products\_SPPv3.0ii-2015. NTPM has been awarded with GECA

ECO CHOICE AOTEAROA programme is operated by the New Zealand Ecolabelling Trust by Agreement with The New Zealand Government.

NTPM has been awarded with The ECO CHOICE AOTEAROA ECOLABEL. The standard is EC-60-21 PAPER PRODUCTS.

While the demand for environmentally sustainable products has only grown exponentially in recent years, the need for sustainable solutions is a timeless problem. Singapore National Environmental Agency (NEA) creates a genuine green certification process that adheres to the highest international standards - ISO14024, when evaluating any product.

NTPM has been awarded with Green Label for the Paper product to Singapore and oversea markets.

NTPM is committed to constantly improving our efficiency and effectiveness to minimize our impact on the environment and to conduct our business in a fair and responsible manner.

This Sustainability Statement describes the Group's commitment towards improving its sustainability practices while also considering the concerns of stakeholders. By focusing on sustainability, the Group focuses and highlights more on economic, environmental and social ("EES") risks to strengthen the local economy, safeguard natural resources and strengthen its bond with the community.

In line with United Nations Agenda and 17 United Nations Sustainability Development Goals ("SDGs"), the Group has adopted these goals as part of our sustainability journey. We have identified few United Nations SDGs which have a direct impact on the Group in terms of risk and opportunity over the long term.

NTPM continues to promote the use of recycled fiber our procurement strategy for sourcing/purchasing of recycled fiber also stated that the fiber material is 100% derived from recycled sources with a minimum 50% from post-consumer sources. In FY2022, 100% of wood pulp procured by NTPM is certified by recognised forest management standards

In the continuous effort to make a Greener Environment and Society, NTPM has conducted many awareness campaigns to the public on the importance of using Eco-Friendly Tissue Paper (recycled paper). In the process of making Eco-Friendly Tissue Paper, we actively promote the usage of 50% post-consumer waste-recovered fiber. By owning the largest wood fiber storage warehouses in Malaysia, which collectively measure 15,000 Sq Meter, we signify our intention to collect and store of used office paper.

## Water Management

Besides energy consumption, NTPM also focuses on effectively reducing water consumption. Over the years, NTPM has constantly upgraded its internal water recycling process system. This is to ensure the quality of the discharged water meets/ or exceeds regulatory environmental standards.

## Energy Conservation

Managing energy efficiency represents one of the biggest opportunities for us to reduce our environmental impact and lower our operating costs. The main source of energy consumption of our manufacturing plant is electricity. We have taken the initiative to explore the use of renewable energy such as solar energy. Currently, the installed 4.5-Megawatt Grid Connected Photovoltaic (GCPV) is for our own consumption and is contributing positively to the reduction in our environmental impact and our operating costs.

As the leading tissue supplier in Malaysia, the Group is putting in tremendous continuous efforts to reduce its energy consumption and to increase the energy efficiency of its tissue machines. We believe that there are opportunities throughout the business to be more energy efficient.

# ROYAL GOLD<sup>®</sup>

C O R P O R A T E

## ROYAL GOLD Corporate Range

Premium tissue designed for superior performance provides the best hygiene solution with its irresistible softness and finest surface. Consult our representatives now to enhance your toiletries budget.

Indulge in the luxury of ROYAL GOLD Corporate range. Made from 100% pulp, it pampers you with the finest touch of silky-smoothness.

# ROYAL GOLD<sup>®</sup>

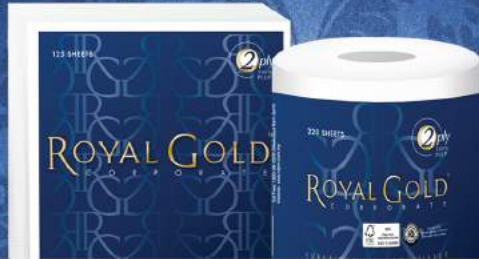

C O R P O R A T E

## ROYAL GOLD Corporate Range

RGC product range is premium tissue designed for superior performance and provides the best hygiene solution with its irresistible softness and finest surface.

Available in the below product Category.

### 1 Bathroom Tissue

It is designed to adapt to high maintenance cost. Soft, strong and absorbent.

### 3 Folded Hand Towel

Uniquely designed for superior hygienic needs. And it even stays strong in soaking wet conditions.

### 2 Facial Tissue

2 ply tissue are luxuriously silky soft yet strong and absorbent.

### 4 Napkin

Committed to be compliant to the food and beverage industry, NTPM napkins abide to the HACCP Certification.

# CONV<sup>®</sup>

Eco-friendly tissue paper

This is designed for your convenient solution and hygienic practices in every area. The CONV tissue product is well-known as Eco-Friendly Tissue Paper.

## 1 Folded Hand Towel

For superior performance and provides best impressions for your hygienic needs. And it even stays strong in soaking wet conditions.

## 5 Jumbo Bath Tissue (JBT)

To adapt to high consumption usage and to save unnecessary maintenance cost.

## 2 Center Flow Hand Towel

For maintenance ease. Each load enable large cost saving and effective dispensing.

## 6 Hand Roll Towel (HRT)

For superior performance and provides a stylish solution to your hygienic needs. And it even stays strong in soaking wet condition.

## 3 Clinical Roll

Strong and durable to provide hygienic environment for your customer. Disposable concept allows unlimited changing of product and provide all time hygienic solution.

## 7 Single Pull Tissue (SPT)

For superior performance and provides best impressions for your hygienic needs.

## 4 Industrial Roll

High absorbency material to fulfill your organisation needs. Strong and durable.

## 8 Bathroom Tissue

It is designed to save for unnecessary maintenance costs.

# PREMIER<sup>®</sup>

the PREMIER<sup>®</sup> tissue

DELUXE

PREMIER Deluxe is a 100% Pulp Product.  
It is uniquely designed for superior performance  
and provides soft and strong tissue.

## 1 Bathroom Tissue

It is designed to adapt to high maintenance cost. Soft, strong and absorbent.
