ENERGY POLICY

Nibong Tebal Paper Mill Sdn. Bhd. (NTPM) is committed to the efficient and responsible use of energy in all its operations to improve energy performance, enhance cost effectiveness, and prevent or minimize potential adverse environmental impacts associated with energy consumption.

NTPM is dedicated to the continual improvement of its energy management system and energy performance. The company shall pursue opportunities to improve energy efficiency and sustain progress in energy conservation through the following commitments:

- (a) Ensuring the effective and efficient use of energy across all operations and activities under its control;
- (b) Complying with applicable legal requirements and other requirements related to energy use, consumption, and efficiency;
- (c) Establishing, implementing and maintaining regular monitoring, measurement, and analysis of energy consumption and energy performance;
- (d) Identifying, reviewing, and evaluating energy-saving and energy conservation opportunities for existing processes as well as new and modified projects;
- (e) Implementing appropriate energy conservation and energy efficiency improvement initiatives;
- (f) Conducting periodic reviews and performance evaluations to ensure the continuing suitability, adequacy, and effectiveness of the energy management system and related initiatives;
- (g) Giving preference, where applicable and economically and technically feasible, to the procurement of energy-efficient products, equipment, and services that impact energy performance; and
- (h) Promoting energy awareness, competence, and participation of personnel working under the control of the organization, including employees and contractors.
