

WATER MANAGEMENT POLICY

NTPM is committed to the responsible, efficient, and sustainable management of water resources throughout our operations. We recognize that water is an essential resource for our manufacturing processes and that effective water management is important for environmental protection, operational resilience, regulatory compliance, and the long-term sustainability of our business.

We shall strive to:

- Minimize water consumption and prevent unnecessary water wastage through efficient practices, appropriate equipment, monitoring, and maintenance;
- Improve water-use efficiency across our operations by identifying and managing significant water uses and opportunities for improvement;
- Promote the reuse and recycling of water where technically, environmentally, and economically feasible;
- Prevent water pollution and protect water quality by managing wastewater and potential sources of contamination responsibly;
- Establish appropriate water-efficiency objectives, targets, and performance indicators, and monitor, measure, and evaluate our water consumption and performance;
- Maintain appropriate records and water mass balance information to support the monitoring and evaluation of water use, where applicable;
- Annually review and disclose our water consumption performance and establish appropriate water-reduction targets to drive continual improvement;
- Comply with applicable legal, regulatory, and other requirements relating to water resources, water use, water efficiency, and wastewater management;
- Consider water efficiency in the design, modification, procurement, and operation of processes, equipment, and facilities where practicable;
- Promote water awareness and responsible water-use practices among employees, contractors, and relevant personnel;
- Provide appropriate resources, information, and support to achieve our water-efficiency objectives and targets; and
- Continually improve our water-management performance and the effectiveness of our water-management practices through monitoring, evaluation, corrective actions, and appropriate water-saving initiatives.

NTPM is committed to achieving these objectives while maintaining product quality, process efficiency, operational reliability, and consideration of the needs and expectations of relevant interested parties.

This Water Management Policy shall be communicated to relevant employees and personnel, implemented within applicable operations, and periodically reviewed to ensure its continuing suitability and effectiveness.
